

The Most Popular Hotel Phone in the World, Redesigned.

Colorado Springs, CO – June 22, 2016 –Cetis, Inc., manufacturer of Teledex®, TeleMatrix®, and Scitec® brand analog and VoIP telephones, is debuting the company’s new Teledex D Series hotel phones at HITEC 2016, Booth #917.

A contemporary redesign of the classic Teledex Diamond, the most popular hotel phones in the world, D Series features a fresh design footprint, ergonomic open handset, optional built-in guest smart device USB charging ports, and a faceplate that is fully interchangeable with existing Diamond room phones.

“How do you improve upon Diamond, the most popular hotel phone in the world for 33 years running?,” Brock Munsell, CTO, Cetis, Inc., asks rhetorically. “We began the development of D Series with a fresh new contemporary design, a robust new ergonomic open handset, and added optional USB charging ports, but maintained the existing Diamond faceplate area for a seamless upgrade experience,” he adds.

The result? Millions of established Diamond Series owners may transition to D Series by simply transferring their existing Diamond faceplates, or opt for new faceplates.

Available in single or two-line speakerphone and non-speakerphone models, hoteliers may choose optional USB charging ports, and up to 10 programmable guest service keys. Patented OneTouch voice mail retrieval technology is also a standard feature on speakerphone models.

“D Series, like all Teledex products, is thoughtfully designed to last for years in demanding hospitality environments,” says Bryce Bowman, Vice President of Sales, Cetis, Inc. “Like the original Teledex Diamond, D Series builds upon the tradition of the most popular hotel phone in the world”, he exclaims.

For Teledex D Series product and pricing information call +1.719.638.8821, write info@teledex.com, or visit www.teledex.com.
