

Teledex E Series USB Hotel Phones Support Guest Smart Device Charging.

Colorado Springs, CO – June 3, 2016 –Cetis, Inc., manufacturer of Teledex®, TeleMatrix®, and Scitec® brand analog and VoIP telephones, has introduced Teledex E Series USB hotel phones with built-in smart device USB charging ports designed to support emerging guest in-room technology preferences. E Series USB guest charging ports are available on single and two-line, analog, VoIP, corded, and cordless speakerphone models, and RediDock remote handset charging stations.

“These phones are amazingly big on features, but surprisingly small in size. They’re up to 40% smaller than standard guest room telephones, and now support guest smart device charging in the room,” states John Grubb, Senior Vice President of Marketing, Cetis, Inc.

Originally styled to meet the limited space and energy requirements aboard cruise ship cabins, E Series requires minimal surface area on the desk and nightstand. Interior designers appreciate the sophisticated extra thin, ultra-stylish body while guests enjoy the familiar, comfortable feel of a sleek, modern handset.

Engineered specifically for hospitality applications, E Series also features patented OneTouch voice mail technology for hands-free auto-dialing and retrieval, up to 12 guest service keys, and customizable faceplates.

For Teledex E Series USB product and pricing information call +1.719.638.8821, write info@teledex.com, or visit www.teledex.com.
