

# YOU'VE GOT TO NOT SEE IT TO BELIEVE IT

With our new ExpressNet® AirLink, adding a high-speed wireless Internet connection to your property's existing phone system is as easy as adding and configuring an ExpressNet AirLink device to the bottom of your, iPhone, Diamond, or Opal telephone.

ExpressNet delivers high-speed connectivity in a wide range of demanding environments. In fact, one AirLink Access Point can cover up to nine rooms. And for guests concerned about security, you may alternately deploy an ExpressNet wired connection.

Best of all, most Cetis telephones are ExpressNet-ready, right out of the box. You've never seen a wireless network as easy to deploy and maintain as ExpressNet. And with no messy wires and no additional desktop devices required, chances are your guests won't see it, either.

For more information call +1 719 638 8821, email [info@cetisgroup.com](mailto:info@cetisgroup.com) or visit us at [CetisGroup.com](http://CetisGroup.com).

# NO-HASSLE WIRELESS.

AirLink

- Combines multiple high speed interfaces in one compact guestroom device
- Wireless bridge provides convenient interface for users that aren't wireless enabled, or prefer a wired connection because of security concerns
- Easily deploy new hotspots almost instantly; no new cabling required
- Guarantees your guests will get online whether they're wireless enabled or not
- Eliminates costly installation and maintenance of ceiling-mounted wireless access points

## Wireless Access Point

To deploy WiFi access in a typical hotel, AirLink wireless access points are installed in approximately every four to six rooms, usually on alternating floors. Each access point serves rooms in its vicinity on the same floor, as well as rooms above and below.

- IEEE 802.11g compliant, up to 54 Mbps
- Adjustable RF output allows range to vary from 12.5% to 100% to decrease interference

## EXPRESSNET®

With our new ExpressNet® AirLink, adding a high-speed wireless Internet connection to your property's existing phone system is as easy as adding and configuring an ExpressNet AirLink device to the bottom of your iPhone, Diamond, or Opal telephone.
