

BEAUTIFULLY ENGINEERED.

At Cetus, the beauty of our phones is more than skin deep. In fact, the best looking telephones in the guestroom industry are also the best engineered.

Blending European design with American engineering, our 3300 Series corded and 9600 Series cordless phones feature your choice of VoIP or analog technologies, and come in black or ash, with an option of seven coloured inserts and customizable faceplates to perfectly coordinate with your brand. We also have an on-site, state-of-the-art SIP engineering team with Cetus IP mass configuration tools designed to simplify installation, and deliver reliable and secure connectivity.

Because at Cetus, we believe the way your phone looks is as important as the way it works.

Contact us today for product and pricing details, and an authorized Cetus reseller near you.
