

**Cetis (EA) Limited are proud to have recently supplied the newly built Leopold Hotel in Oudenaarde, Belgium and Premier Suites Ballsbridge in Dublin, Ireland with the Teledex I Series ND2105S in Black. These telephones were chosen as the preferred handset for the guest-rooms in the Hotels and have been connected to a 3CX Phone System for Microsoft Windows.**

London – December 2, 2014 - The Leopold Hotel is the first boutique hotel in the Flemish Ardennes and overlooks the river Scheldt in the vibrant new De Ham district. The historic city centre, within walking distance of the Hotel, has a lot to offer for all interests. The Town Hall and Belfry are on the UNESCO World Heritage List with the MOU (Museum) bringing thousands of years of history to life. Whilst at the MOU you can admire the original tapestries and one of the largest silver collections in Flanders.

Stylish and modern, the Leopold Hotel Oudenaarde effortlessly fuses elegance, practicality and fantastic service for the ultimate hotel experience whilst also using all the Leopold hallmarks that make guests return again and again: relax and unwind in elegant bedrooms, enjoy refreshing cocktails, fine wine and the best Belgian beers in the bar along with taste tantalising dishes any time of the day and night.

Premier Suites Ballsbridge is located on Merrion Road in the upmarket area of Dublin 4. This former guest house has undergone extensive renovations and has re-launched with 52 spacious suites in Autumn 2014 under the Premier Suites brand. This luxury property is ideal for a short city break or a longer term stay, having a superb location next to the RDS and the Aviva Stadium. Premier Suites Dublin Ballsbridge is also just a short distance from Grand Canal Docks, the IFSC and Dublin city centre and enjoys excellent transport links to the city and airport.

The Group IT Manager for the PREM Group, Seán Graham commented:

“As these new properties were a new build and renovation, we were able to cable with CAT5/6 entirely and as such we were looking to fit them out with the latest available technologies such as IP TV, Wireless Door Locks, IP Phones and IP CCTV. We deployed 3CX as our phone system of choice as we wanted to use SIP trunks to get the benefit of cost savings for ourselves and our customers. Cetis IP Phones worked seamlessly with 3CX and integrated easily with easy deployment. With custom faceplates and programmable keys, they were an easy choice for us to make.”
