

Rixos Seagate Sharm Completes Triple Play with TeleMatrix 3300 Series Phones.
3300 Series feature PassThrough RJ45 Ethernet port, and patented OneTouch voice mail.

Colorado Springs, CO – December 15, 2016 – Cetis, Inc., manufacturer of Teledex®, TeleMatrix®, and Scitec® brand analogue and VoIP telephones, has announced the installation of 1,000 TeleMatrix 3300 Series analogue guestroom phones and an equal number bathroom phones at Rixos Seagate Hotel Sharm El Shiekh Egypt, operated by Rixos Hotels, and owned by Radamis Group.

According to Dvise Telecom Solutions partner Summit Technology Sales Manager, Bassem Fayeze, “Rixos Seagate Sharm El Shiekh had a need to implement a complete triple-play solution, including a passive data network, Avaya IP telephony, and Telematrix hospitality analogue phones for guest rooms.”

An HPE active data network, Wi-Fi, Locatel IPTV, HPE

servers and storage, STS implemented all the above within the hotel. The project involved providing IT infrastructure, network design and implementation, hardware supply and installation, application migration.

Challenges for the project included:

- No infrastructure for hotel renovation
- Very short implementation time
- Raceways and cables paths were not yet completed

The benefits provided to the client on this project are:

- A single unified, fully redundant network
- Flexible and expandable solution
- Complete network security
- Customer satisfaction

Rixos Seagate chose Telematrix 3300 Series analogue phones for the project. "TeleMatrix 3300 Series phones are very popular due to their rugged construction and appealing design", says Mahmood Khan, Director Corporate Sales at Dvise Telecom Solutions.
